

THE ECO-FRIENDLY CHAIR...

Your "Natural" choice in seating.

ECO
FRIENDLY

- Chameleon chairs were designed with the earth's resources in mind. Our product is made of steel, our planet's number one recyclable material.
- Steel is the only substance that can be recycled, over and over, without ever losing its quality.
- In today's recycling facilities, steel production emits almost no pollutants.
- Since Chameleon chairs and barstools are constructed of steel rather than wood, we contribute to the preservation of our forests.
- Chameleon's efficient dolly storage system maximizes the number of chairs transported thus conserving fuel.
